

**PAPER DESIGN<sup>®</sup>**  
architecture that comes to life

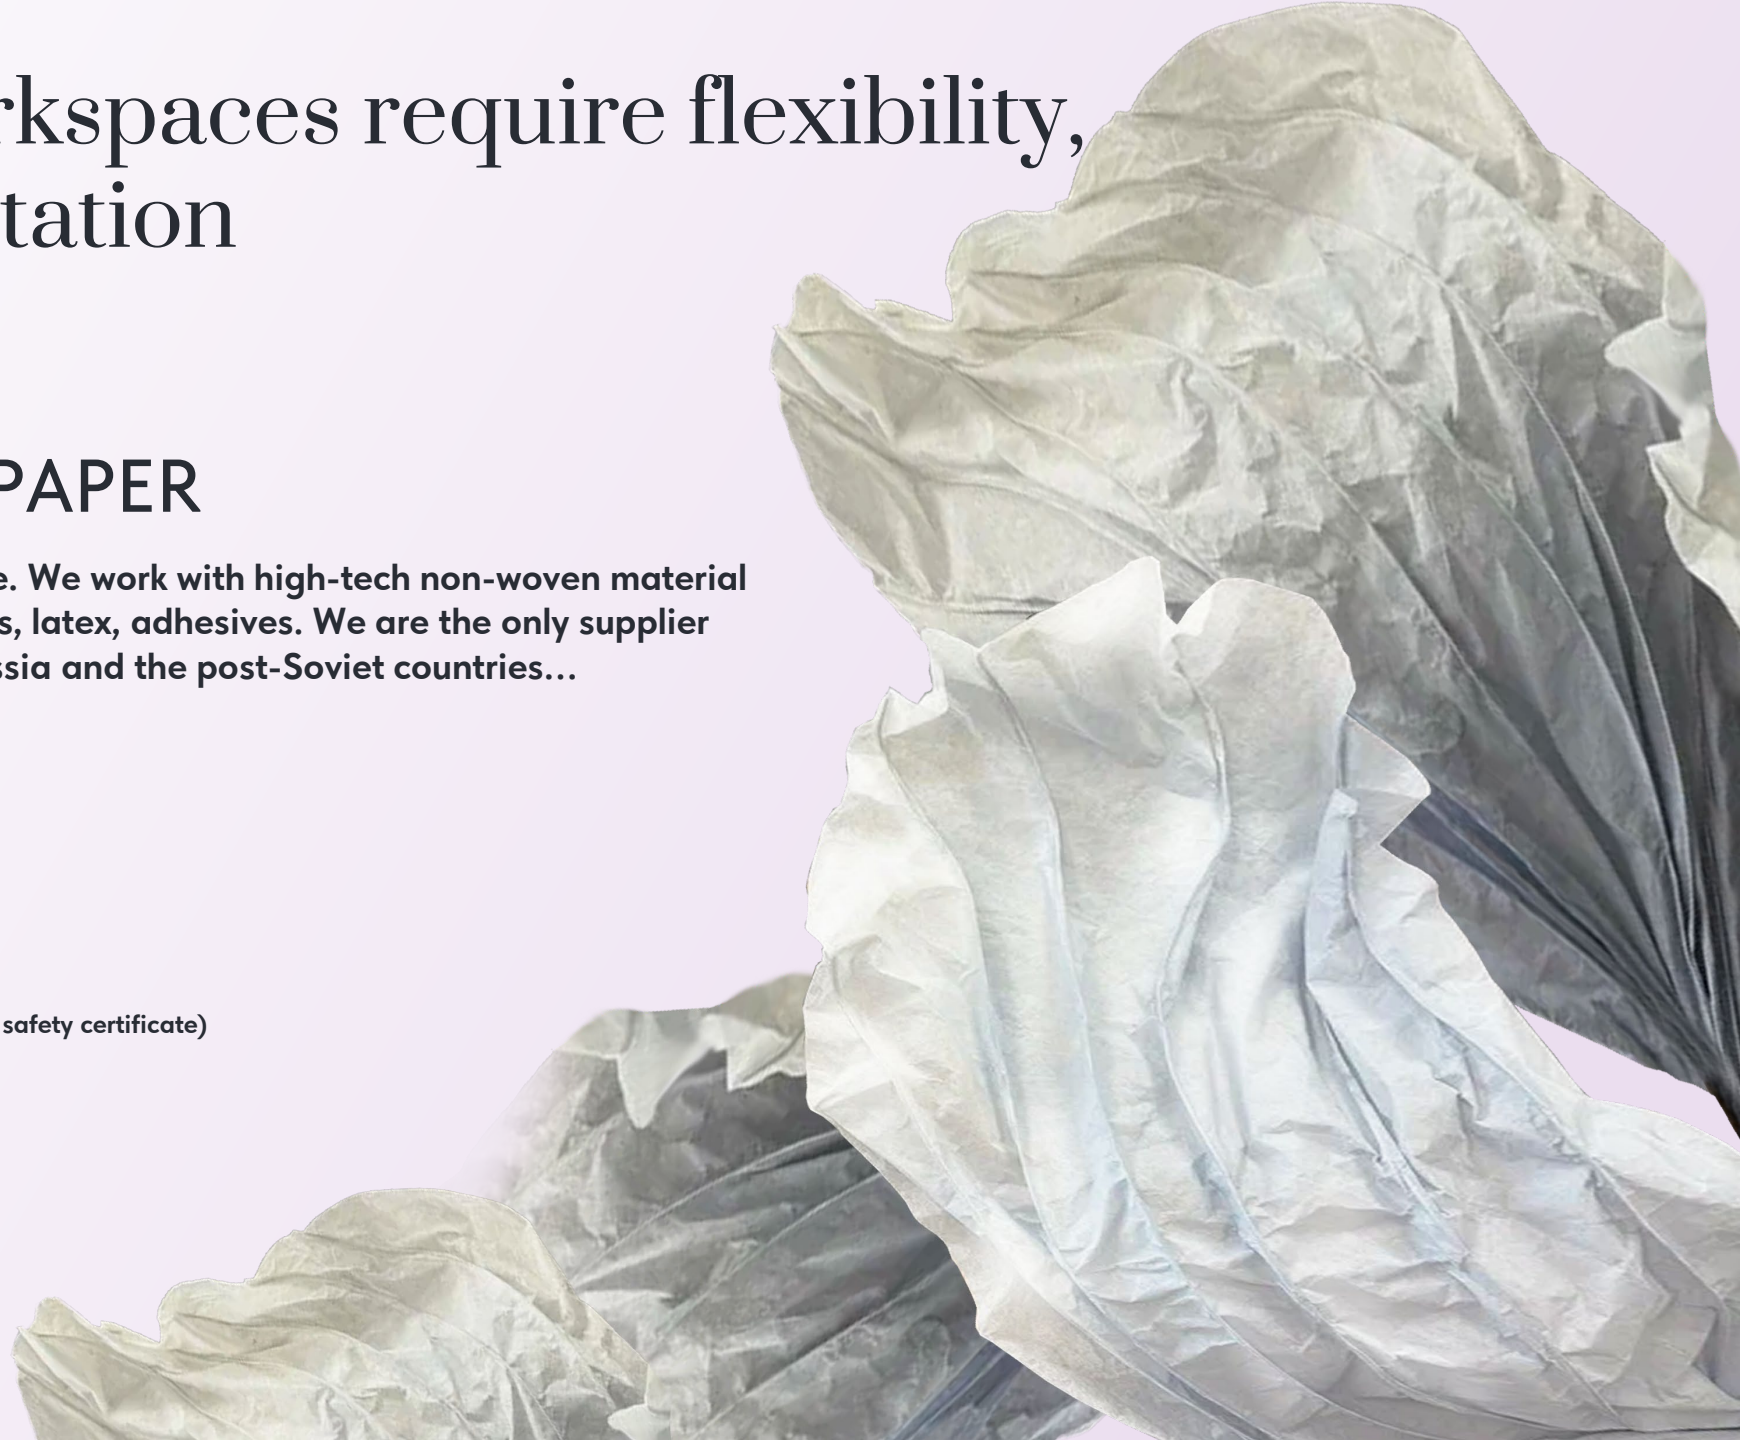

# New types of workspaces require flexibility, inspiration, adaptation

## Our material is NOT PAPER

Even though it may seem so at first glance. We work with high-tech non-woven material Drop Paper®, made of cellulose, fiberglass, latex, adhesives. We are the only supplier of architectural paper Drop Paper® in Russia and the post-Soviet countries... So why is it ideal for our projects?

### CHARACTERISTICS

- Does not support combustion (Russian/European fire safety certificate)
- Transparent
- Moisture-resistant
- Light
- Anti-static
- Sound-absorbing
- Elastic

# Architectural transformation without construction

Ceilings as a «fifth facade» — an easy way to update the interior, zone, add movement and meaning

# Visual environment and perception

Color, light, shape, movement —  
impact on perception  
and behavior

# Visual environment and perception

Color, light, shape, movement —  
impact on perception  
and behavior

# Visual environment and perception

Color, light, shape, movement —  
impact on perception  
and behavior

The background features a large, abstract, wavy pattern in shades of blue and purple, resembling a topographical map or a fluid, organic form. In the foreground, there are several kinetic ceiling designs. On the left, a series of blue, pleated, fan-like structures hang from thin wires. On the right, there are three more kinetic ceiling designs: a white, multi-faceted, dome-like structure hanging from a wire, a blue, multi-faceted, dome-like structure hanging from a wire, and a white, multi-faceted, dome-like structure hanging from a wire.

# Aesthetics of adaptability: kinetic design

Kinetic ceilings as a symbol of a living office —  
they move, respond, inspire

# Kinetic Ceiling

## a ceiling that comes to life

— the first kinetic ceiling system of a new generation. This is a ceiling that comes to life and sets the rhythm of the entire space. We have created not just a structure, but a living architecture that moves, breathes and fills the room with energy

---

### INNOVATION

- **Unique kinetics:** smooth movement of ceiling elements is based on a customized scenario
  - **Individual design:** any shape, color, dynamics of movement.
  - **No analogues on the market**
  - **Additional options:** exclusive gradient coloring, author's lighting scenarios, synchronization with music and events
- 

### CHARACTERISTICS

**Width:** from 3 m

**Length:** from 1.5 m (further with a step of +1.5 m)

**Minimum height of the ceiling space for installation:** 0.65 m

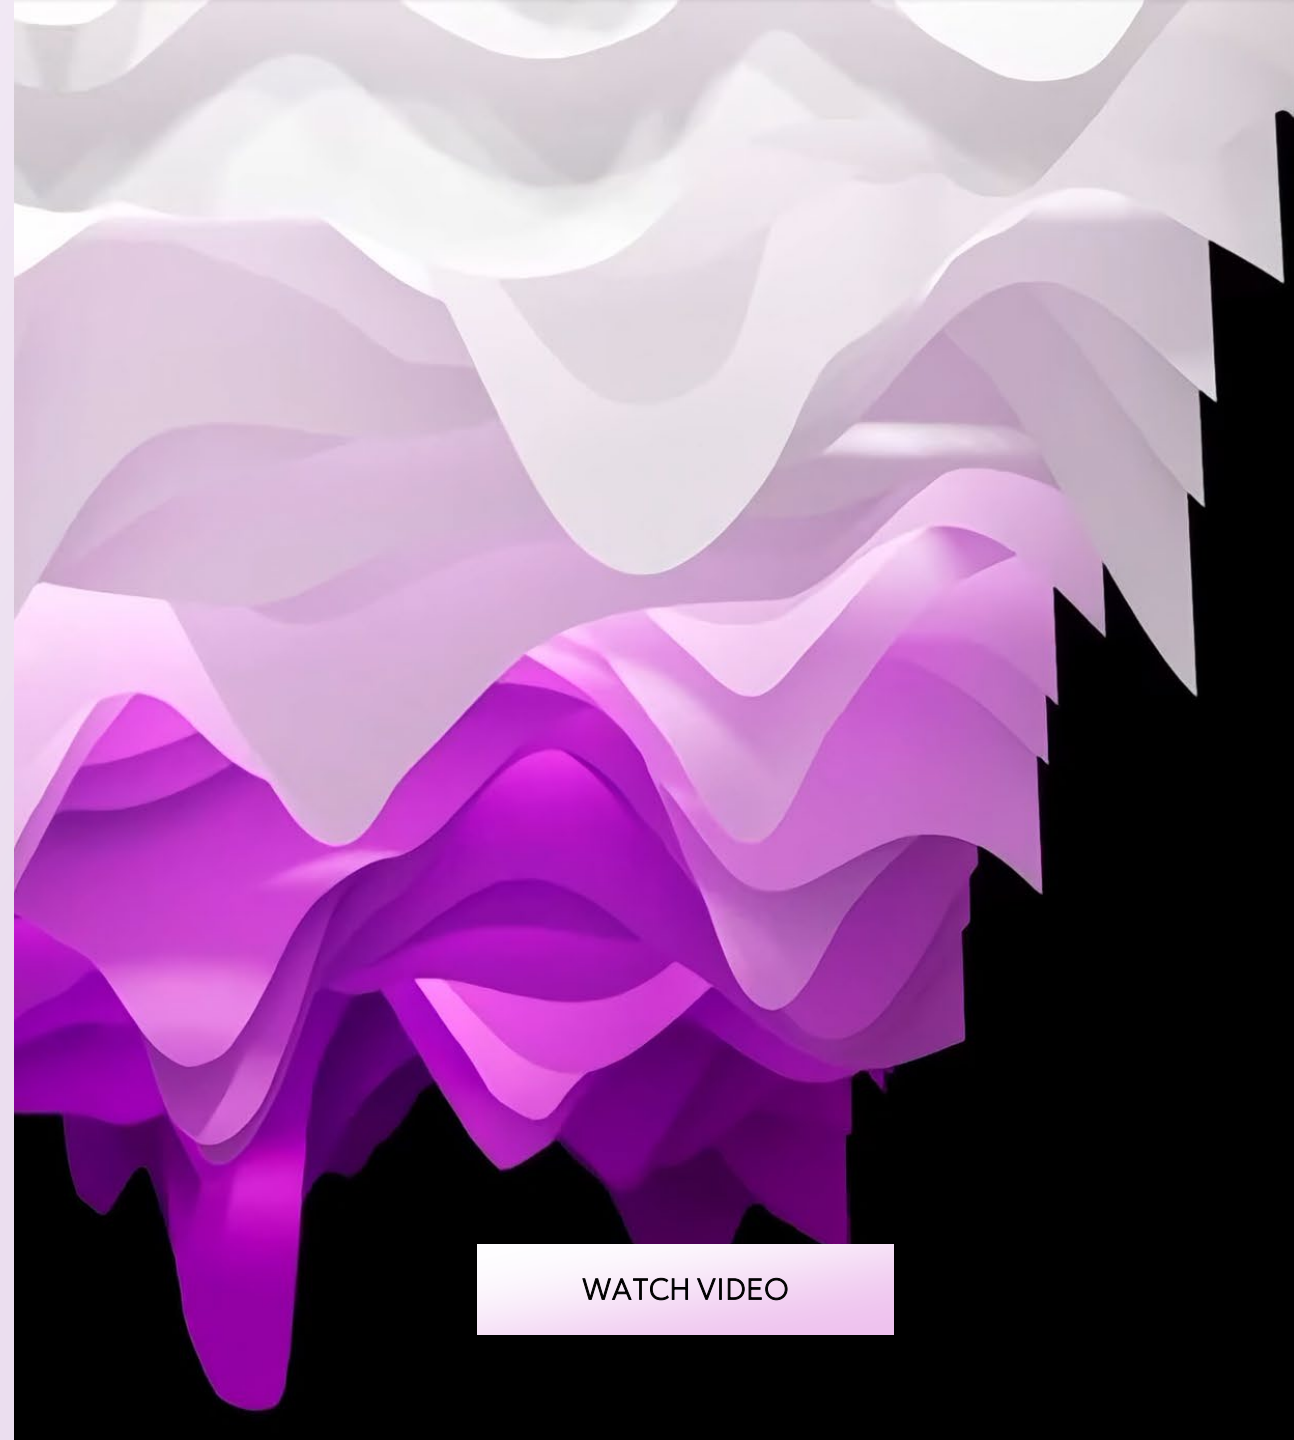

**Type of fastening:** cable suspension to the ceiling

**Power voltage:** 200-2240 V, 50 Hz

**Required power:** 0.2 kW / 22m<sup>2</sup>

**Distribution weight:** 10 kg/m<sup>2</sup>

**Fire certificate:** M1

# Kinetic Form

## architecture in motion

— kinetic architecture available in three unique designs. Each object comes to life, opening up and transforming the space  
- from a secluded hallway to a large-scale goal

---

### THREE UNIQUE DESIGNS

1. honeycomb structure
2. origami flower
3. fantasy flower

---

### APPLICATION

Ideal for decorating entrance areas, hotel and restaurant foyers, cultural spaces and art installations.

---

### CHARACTERISTICS

**Diameter** : 1200, 1000 и 800 mm

Can be made in white, colored or textured

**Movement** : opening/closing rhythm control

Suitable for individual and group installations

**Weight of the structure** : depending on size from 5.5 to 6 kg

**Fire safety** : M1

# Plisse Kinetic

## presence effect

— This is a development of the Plisse Art idea: the composition begins to slowly rotate around its vertical axis, giving the space dynamics and liveliness

---

### UNIQUENESS

- Live animation of vertical
- Visual expansion of space
- Minimum weight with maximum effect

---

### APPLICATION

The best solution for stairwells, spaces with high ceilings, entrance areas, showrooms, shopping galleries

---

### CHARACTERISTICS

**Material :** Drop Paper ® (80 g/m²)

**Width :** 20-80 cm

**Length :** up to 16 m

**Fire safety :** M1

# Aquamorph Light

light that breathes and changes

— It is not just a source of light, but a living object in space. Its organic shell shape creates dynamics in space: a soft up and down movement is accompanied by wave-like oscillations of the surface, creating a feeling of breathing

---

## APPLICATION

Ideal for decorating entrance areas, hotel and restaurant lobbies, cultural spaces and art installations

---

## CHARACTERISTICS

**Diameter** : 110 и 130 cm

Can be made in white or color

**Movement** : vertical with soft oscillations

**Backlight** : dimmable, gradient change

Suitable for individual and group installations

**Вес конструкции**: 9.5 kg

**Fire safety** : M1

The image shows an exhibition space with several large, colorful, kinetic paper sculptures hanging from the ceiling. The sculptures are made of pleated paper and are illuminated from within, creating a warm glow. The colors include yellow, orange, pink, and purple. In the foreground, a group of people are gathered around a white, curved table, looking at the sculptures. A woman in a dark dress is standing near the table, possibly a guide or curator. To the right, a red sign on an easel displays the number '57' and the text 'PAPER DESIGN'. The background is dark, with some red light structures visible. The overall atmosphere is artistic and modern.
